

## VICE PRESIDENT'S / MEASUREMENT COORDINATOR'S REPORT ... QRYA 2008 AGM

A quiet time for me as Vice President as David was able to chair all meetings held during the year with consensus reached on all discussion items without too much lengthy debate. It is good to see the enthusiasm shown by the QRYA Committee thus ensuring Clubs that we are always working towards the betterment of Model Sailing in your State. It could be an interesting year coming up with new classes wanting recognition particularly the Mini Magics which are taking off like a runaway bus.

In my dual role as Measurement Coordinator again there has not been very much that Club measurers have needed. Only one Club sought help with an interpretation and this was resolved with a careful reread of the class rules.

I am disappointed with Clubs reporting back to me following Major Event regattas. It has been clearly laid out in correspondence to all Club Measurers that their Measurement Report is to be forwarded to me as soon as practical after the event. Unfortunately some clubs, after many reminders, chose to ignore this request. I cannot stand at their shoulder until a report is produced but I will consider the reassignment of their next regatta until they are ready to comply. So, Club Measurers, take note and please send in those reports.

I must make mention of our Secretary David Black's tireless work during his years in office. Without David's dedicated work the Association would not be in the strong position it is today. Thank you to all outgoing Officers and I look forward to a productive year to come.

Ian Ashe.
